Cantaloupe Facts: The North American

cantaloupe, common in the United States, Mexico, and in some parts of Canada, is actually a muskmelon, a different variety of *Cucumis melo*, and has a net-like (or reticulated) skin covering. It is a round melon with firm, orange, moderately sweet flesh and a thin, reticulated, light-brown rind.^[6] Varieties with redder and yellower flesh exist, but are not common in the U.S.
