## Yukon Gold Potato Facts:

Yukon Gold potatoes are available year-round. Yukon Gold potatoes are an early bearing variety that produce somewhat flattened globular shaped tubers. Their rough yellow-brown skin with shallow eyes surround a distinctive yellow moist & waxy flesh. When cooked the flesh is buttery and creamy. Yukon Gold potatoes are great for making french fries, as well as hashbrowns, gratins and purees. They pair well with cream, butter, olive oil, shallots, garlic, bacon, cheese, fried and scrambled eggs, pork, sausages, white and red-fleshed fish, beef, lamb and herbs such as oregano, cilantro, basil and tarragon.
